

Arvind Tacouri

I like to discover new things and learn. Mauritian at heart. I am an ardent proponent of 'keep it simple and stupid'. My wife would agree that I can be stubborn at times, but the voice of reason always gets through. I like exploring challenging concepts and ideologies - growth comes through adversity.

Date of Birth: 01-Nov-1989

Work Experience

SEO Specialist at LUCRIN Mauritius Ltd - 4 years (March 2013 to Now)

SEO

- Find potential high-value links on the web, and build a network whilst following proper Google guidelines
- Monitor competition
- Keyword research & planning
- Work closely with front-end and back-end developers for implementation of proper page layout, schema data, sitemaps and SEO related tags
- Write/Edit content to be search engine friendly
- Define guidelines for editorial team for creation of new products
- Management of Google Search Console & Bing Webmaster Tools
- On-site image optimisation
- Domain name planning for local SEO visibility
- Train interns and delegate part of the text editing & CMS management

Newsletter

- Integrate graphic emails to comply with guidelines for proper rendering on all mails clients/browsers while maximising deliverability

- Use Adobe Dreamweaver & Inkbrush for email slicing
- Use IBM Silverpop (now IBM Watson Campaign Automation) to schedule, design, automate and create programs to assist the customer
- Use Exacttarget (now Salesforce Marketing Cloud) & Verticalresponse on Salesforce for setting up newsletter campaigns

Paid Marketing

- Use Sketch for image ad derivation into appropriate formats - closely worked with graphics team
- Use Adwords Manager Account to manage several Adwords account for various countries
- Use Google Adwords Editor for bulk edits to campaigns across accounts
- Create and optimise standard & dynamic search ads
- Create and optimise remarketing & targeting image ads
- Limited exposure to creation of video ads
- Google Merchant Center management including Google Customer Reviews (also implemented, now deprecated, Google Trusted Store)
- Create, manage & optimise Google Shopping ads across several adwords accounts in various languages
- Create, manage & optimise Bing search & shopping ads
- Limited exposure to Amazon advertising features
- Limited exposure to Facebook for business and its ads creation environment

Reporting

- Implement Google Analytics for ecommerce and oversee back-end implementation of order tracking
- Use Google Tag Manager to implement event, page and conversion tracking codes
- Analysis of reports, and define path of action using data from Adwords, Search Console, Google Analytics, Moz, Google Trends, Google Data Studio, Salesforce
- Implement Google Optimise and set up campaigns to help define future path of action

CRM & Website Management

- Use of Jira and Git for task allocation and sub-versioning for website html updates
- Administration of Magento's (Enterprise edition) back office features
- Management of domain names & zone files
